Here's the thing: You have all these people from both sides of the aisle carrying on about how other countries should treat all of there citizens with equality and justice and that lofty notion is not even being applied here in our own country. Same sex couples are expected to pay taxes just like everyone else, yet not receive representation. "...No taxation without representation..." does that ring a bell??? How about, "...separation of church and state..."??? And what about all these politicians who fight so hard for the, "...sanctity of marriage..." from there pulpits but in reality are cheating on their spouses? The latest being the Governor from South Carolina (Sanford). Wasn't he one of the ones leading the charge against Bill Clinton a few years back and a huge mouth piece for DOMA? The

term "hypocrite" comes to mind. With all that is going on in the world, denying consenting adults equal rights in the country that is supposed to have been founded on freedom, a country that I love, just seems a waste of time and energy and is taking away from the real issues that face us here in America and globally. As for Mr. Obama, does he really need to be reminded that when his parents were married that it was illegal for them to do so in many parts of this country? And look where he is now, I guess the world did not come to an end and the offspring of that couple did not come out with pokadots and did pretty well for himself. (By the way, I am also of mixed racial and ethnic heritage and have done quite well for myself - and no zebra stripes.)

Your Studio 12 show on vaccines was the most biased, untruthful, ridiculous program that I have ever had the displeasure of watching. You should be completely ashamed of yourselves. What a poor host and what disgusting, "warm & fuzzy" guests. Let me tell yo something; it's not warm and fuzzy when YOUR child dies as a result of being vaccinated. My unvaccinated child is the healthiest child I know. I've done my research and I know the truth. You obviously are not interested in any such thing. I don't "ask my doctor" because my child is so healthy, he doesn't need a doctor. Imagine that, almost thirteen years of life with no doctor, no antibiotics, not one ear infection, not one green snotty nose, nothing. Please, by all means, find me an unvaccinated child with autism or an unvaccinated child that died of "SIDS".
